Wall Sides Story

Groupe 4/ Ana BRUTO DA COSTA - Louiza FERGANI - Alba GUILLEN CAPELL – Basia KUBICKA - Sini KOTILAINEN –
Inspiration
Once upon a time there was a big defensive wall built to protect the medieval city of Eivissa from the enemies.

Nowadays it is still an unconquerable fortress, although there are no more enemies. People with different kinds of disabilities cannot easily enter the city because of many obstacles that they can meet on their road.

The wall side story shows us how we can discover this city from different sides - external, inside the wall and inside the city – without any boundaries.
Strategy

No connections

Breaking the wall

Creating accessibility

Through the Bastions

Connections by squares

Meeting points

Connections

Lift
Guiding line created with contrast materials and lights to lead people along the wall and inside the city. New info boards with raised maps are scattered through Dalt Vila to make the orientation easier.
