The main area in the old town is on the top, the place near the church. If we are on the top, we can go everywhere. On the top it should be a spring that creates into the streets a water path understandable by everybody. Sometimes the path hurts some high places, like obstacle, people follow the river to go there. Water is sensation, everybody can hear the water crossing the street, can touch it, can feel it. It’s easy for everybody to understand how follow the path. Also the water refreshes the streets in summer. Water can discover places.

At night, a new atmosphere enters in the streets. The water path changes, becomes a light spring that reflects to the street.
